The screenshot shows a Windows-style application window titled "ForeRunner Operation". The title bar has standard icons and a close button. The main area contains the following content:

- Contents**: A section header.
- Welcome message**: "Welcome to ForeRunner Operation. Below are links to the sections of this module. To navigate, click the Next button in the bottom right corner, or click a link to a specific section. You can return to this page at any time by clicking the Module Contents button in the bottom left corner of any of the following pages."
- Table of Contents**:

1. Introduction	604
2. Shock Scenario	
3. No-Shock Scenario	
4. ForeRunner Demo	
5. Summary	
- AUDIO**: A link labeled "608" with a wavy arrow pointing to it.
- PAGE FLOW**: A vertical line on the left side of the window frame, with "602" at the top and "603" at the bottom.
- PAGE NUMBER**: "610" is displayed in the top right corner.
- PAGE NAVIGATION**: A "NEXT" button in the bottom right corner with "606" above it, accompanied by a wavy arrow.
- Page footer**: "Page 1 of 15" is visible near the bottom of the page.

The screenshot shows a computer screen with a window titled "ForeRunner Operation". The window contains a "Shock Scenario" section with instructions for placing electrodes on a patient's chest. To the right is a diagram of a human torso with electrode pads placed on the chest area. A callout box labeled "Place Pads" points to the left side of the chest. The page number "820" is displayed above the diagram. At the bottom of the window, there are "AUDIO" and "MODULE CONTENTS" buttons, along with "BACK" and "NEXT" navigation arrows. The page footer indicates "Page 8 of 15".

Shock Scenario

Open the electrode pads package and remove the pads. Following the pad icons, place one pad just below the patient's right collarbone. Place the other pad on the patient's left side, over the ribs below the breast. After assuring that the pads are firmly attached to the patient's chest, plug in the pads connector next to the flashing light on the ForeRunner.

Shock Scenario

When the pads are connected, the ForeRunner immediately begins to analyze the patient's heart rhythm. It is important that rescuers do not touch the patient while the ForeRunner is analyzing. If a shock is indicated, the ForeRunner will provide voice and screen prompts and the orange triangular shock button will flash.

ForeRunner Operation

Shock Scenario

Before delivering the shock, it is important that the ForeRunner operator visually and verbally clears the patient. The ForeRunner operator should shout, "I'm clear," "you're clear," or simply "clear." Visually check to be certain that no one is touching the patient.

710

After making sure everyone is clear of the patient, press the orange button to deliver the shock.

The screenshot shows a computer window titled "ForeRunner Operation" with a sub-section "Shock Scenario". Inside the window, there is a text block instructing the operator to visually and verbally clear the patient before delivering a shock. It includes a photograph of a patient on a stretcher. To the right of the text and photo is a large bracket labeled "1518". Below the photo is a speaker icon labeled "1024". At the bottom of the window are buttons for "MODULE CONTENTS", "Page 10 of 15", "BACK", and "NEXT". The window has a standard OS X-style menu bar at the top.

FIG. 11

1100

The screenshot shows a window titled "ForeRunner Operation" with the sub-tile "ForeRunner Demo". Inside the window, there is a text area with the following content:

Let's practice using the ForeRunner in a scenario involving Sudden Cardiac Arrest. Click Dr. Hart, our Medical Director, to begin the tour.

Below the text is a cartoon illustration of a doctor named Dr. Hart, wearing a white lab coat and a stethoscope, pointing towards a small inset image. The inset image shows a handheld device with a screen displaying a medical interface. To the left of the doctor is a button labeled "AUDIO". To the right of the doctor is the number "1126".

At the bottom of the window, there are several buttons:

- A button labeled "MODULE CONTENTS" in a dark box.
- A "BACK" button with a left-pointing arrow.
- A "NEXT" button with a right-pointing arrow.
- A page navigation button labeled "Page 14 of 15".

The window has a standard operating system title bar at the top with icons for minimize, maximize, and close.
